

The Ultimate Solution for Oil Filtration
Experience up to 100% Uptime (ZERO Hydraulic Down Time)
with FLUENT PRIMA for Hydraulic Equipments.

Benefits Of Clean Oil

1

Almost 100% uptime.

2

Substantial increase in component life.

3

Drastic reduction in wear & tear.

4

Multiple times increase in oil life.

5

Oil quality remains NAS 7 **throughout operations**, all the way till oil change.

Injection Moulding

Hydraulic Press

Die Casting Machine

CNC/VMC Machines

About fluent® PRIMA

1

Operates with existing system pressure

2

Maintains oil quality better than virgin (NAS 7 throughout the time)

3

Compact in size

4

High dirt holding capacity with VATS G2D technology

5

Easy to install

Hydraulic Oil

FLUENT PRIMA is the ultimate solution for stationary hydraulic machines like injection molding, blow molding, rubber molding, presses, aluminum pressure die casting, SPMs and many more.

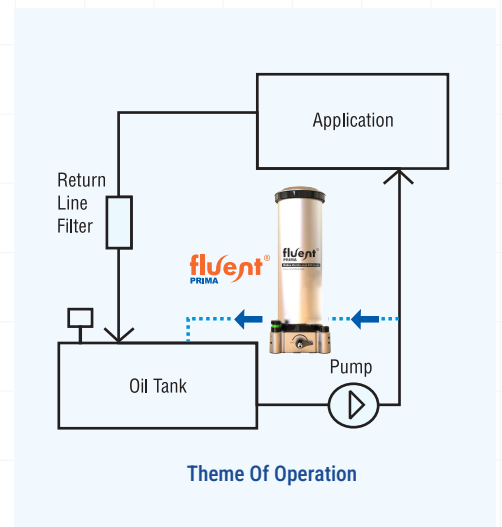

Product	FLUENT PRIMA		
Model	15H F7	30H F7	60H F7
Tank Size	upto 400 L	upto 800 L	upto 1600 L
Quality	NAS 7		
	ISO 17 / 15 / 13		

F7 = NAS 7 (ISO 17/15/13)

(A) All quality options available from NAS 10 (ISO 21/19/16) to NAS 4 (ISO 15/13/10)

(B) Higher capacity models available on request

(C) Option available with additional moisture removal

For Your Manufacturing Plant

- Flushing machines - individual or centralised.
- Ask for your customized application like oil dispensing, high viscosity (lube / gear) oil filtration and other filtration requirements.

Other Industrial Product & Services

Oil filtration system for test rigs.

Solvent (1 cst) to oils (1000 cst) purification system available.

Moisture separation up 100 PPM.

Particle counter with print/ data logger/ SMS/ email.

VATS IOTA - on field service with 100% responsibility of quality and cost.
